Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 July 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. This Office Action is in respond to communication filled on July 17, 2004.
2. Claim 1 is pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pub. No. 2002/0123337 to Dharian et al (hereinafter Dharian) and further in view of U.S. Pat. No. 5,864,579-to Briskman. Dharian discloses a system for data transmission and reception comprising (abstract):

a wireless data broadcast system broadcasting outgoing data from a data network to a plurality of users, the wireless data broadcast system further comprising (Fig. 1, element 123, 101, 111-n, MS):

a wireless data return path system receiving incoming data from the plurality of users and providing the incoming data to the data network, the wireless data return path system further comprising (page 1, [0005]; Dharian teaches an up link and down link for receiving and sending traffic between users and BTS):

One or more wireless collector systems receiving data from a predetermined set of the plurality of users (page 1, [0005]; Dharian teaches the use of collectors to broadcast traffic);

Although the system disclosed by Dharian shows substantial features of the claimed invention, it fails to disclose:

one or more wireless broadcast repeaters and one or more return path repeater systems receiving data from one or more predetermined wireless collector systems; and

wherein the system uses terrestrial line-of-sight broadcasting in conjunction with satellite data transmission systems.

However, in an analogous art, Briskman teaches:

one or more wireless broadcast repeaters (Fig. 1, Briskman teaches repeaters in figure 1) and one or more return path repeater systems receiving data from one or more predetermined wireless collector systems (col. 6, line 8 – 54); and

wherein the system uses terrestrial line-of-sight broadcasting in conjunction with satellite data transmission systems (abstract, Fig. 1, col. 2, lines 35 – 60).

Given the teachings of Dharian and Briskman, a person having ordinary skill in the art at the time of the invention would have recognized the desirability and advantages of adding repeaters and using terrestrial line-of-sight broadcasting in conjunction with satellite in order to increase reliability.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
